DETAILED ACTION

1. This application appears to be in compliance with the Sequence Rules.
2. Claims 1-25 are pending.
3. This application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the hematopoietic cells are:
 - A) autologous or
 - B) allogeneic.

In addition to electing between autologous and allogeneic hematopoietic cells, this application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the source of hematopoietic cells is:

- A) bone marrow or
- B) peripheral blood.

These species are distinct because of the processes and ingredients associated with the types / sources of hematopoietic cells as well as the properties of the cells themselves with respect to hematopoietic stem cell transplants differ to such an extent and require non-coextensive searches to such an extent that they are considered separately patentable.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (e.g., *autologous, bone marrow*) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic, for example.

4. In addition to electing the type / source of hematopoietic cell from Section 3 above, this application contains claims directed to the following patentably distinct species of the claimed Invention: wherein the nonmyeloablative conditioning regimen is:
 - A) radiotherapy,
 - B) chemotherapy,
 - C) immunosuppression, or
 - D) combinations thereof.

These species are distinct because the process steps, ingredients and endpoints differ to such an extent and require non-coextensive searches to such an extent that they are considered separately patentable. The examiner notes that these conditioning regimens rely upon ingredients that do not share a substantial structural feature essential to a common utility.

Art Unit: 1644

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic, for example.

5. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gambel whose telephone number is (571) 272-0844. The examiner can normally be reached Monday through Thursday from 7:30 am to 6:00 pm. A message may be left on the examiner's voice mail service.
